S.S.S. CURES BLOOD POISON

Removing the outward symptoms is not all that is necessary to cure Contagious Blood Poison. The virulent germs which produce these external manifestations must be completely driven from the blood before a real cure can be effected. The least taint left in the circulation will sooner or later cause a fresh outbreak of the trouble, with all its hideous symptoms of ulcerated mouth and throat, copper-colored spots, falling hair, sores and ulcers, etc. Only a blood purifier can cure Contagious Blood Poison. Medicines which merely check the symptoms for a time, because of their strong mineral nature, and leave the poison smoldering in the system, have brought disappointment to thousands. The disease always returns after such treatment. S.S.S. cures Contagious Blood Poison and cures it permanently. It goes into the blood, and removes every particle of the poison, making the circulation pure, rich and healthy, nor does S.S.S. leave the slightest trace of the disease for future outbreaks. S.S.S. does not contain any mineral ingredient, but is made entirely of roots, herbs and barks, which are most valuable in their blood-purifying properties, and at the same time specifically adapted to building up the entire system. If you have Contagious Blood Poison S.S.S. will cure you because it will thoroughly purify your blood. Home Treatment Book and any medical advice free to all.
